GALLUP**

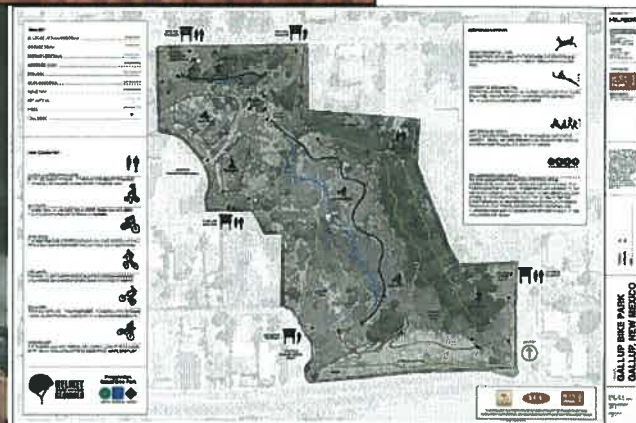

Ride with Levi

Ride with Levi Leipheimer in Gallup, New Mexico —
September 20-22, 2013

Join Levi Leipheimer and fellow cyclists in Gallup, New Mexico for a weekend of time trials, mountain bike racing, a one-of-a-kind auction, and the opportunity to ride with a legend. Check the Event Info tab for all the details.

KEY INFORMANTS

The author appreciate the input of key informants who were contacted for this study and agreed to be provide key survey data and interviews in order to provide additional insight into the study approach and processes. In addition to the persons listed below, other individuals offered informal opinions, and these contributions were also appreciated.

- Bill Siebersma | Gallup Trails
- Lindsay Mapes | Zia Rides, Inc.
- John Masci | Business Owner & Trail Enthusiast
- Jennifer Van Drunen | Squash Blossom Classic, Inc.
- Robert Kuipers | Regional Transportation Planning Organization
- Karl Lohmann | Youth Conservation Corps
- Strider Brown | Legendary Trail Designer and Shaper

PREFACE

This report, prepared by Northwest New Mexico Council of Governments (COG), is intended to highlight the progress of the “Adventure Gallup” initiative originally envisioned in 1999 and to document the economic significance of adventure tourism related travel to our region and McKinley County over the last ten years.

The COG facilitated the initial conversation and has coordinated this initiative from its infancy. The evolution of this dream has been an amazing ride in and of itself. The COG has been the depository of event survey data and has helped translate this information into short economic impact snapshots. These studies have been helpful to Adventure Gallup & Beyond, who provides gatekeeper responsibilities for High Desert Trail System (HDTs). The HDTs is entirely on private land for which the County acquired an easement that is dependent on promoting economic development. Also, several event promoters utilize these reports to showcase to the City Lodger’s Tax Board and City Council return on investments.

With gratitude, the COG is proud to have been allowed a seat at the table of this movement by the broader Gallup community. This initiative reinforces the idea that together we prosper and divided we fail. We want to thank all the volunteers who support this movement, and continuously strive to make Gallup a more prosperous and healthy place for all.

Finally, special thanks are due to Patty Lundstrom and Bob Rosebrough for their political and civic leadership, without their guidance and investment, this initiative would not have been possible.

We have been pushing the rock uphill for 10 years, and it’s almost to the top where it will roll downhill very fast. Let’s stay on the same page, stay focused, and stay together. The last mile or section is always the hardest. Let’s drop the hammer!

Adventure, respectfully.

Evan Williams, Deputy Director
Northwest NM Council of Governments

Most Popular Outdoor Activities by Participation Rate

Outdoor Participants, Ages 6+

1. **Running, Jogging and Trail Running** | 19% of Americans Ages 6+, 53.2 million participants
2. **Freshwater, Saltwater and Fly Fishing** | 16% of Americans Ages 6+, 46.0 million participants
3. **Road Biking, Mountain Biking and BMX** | 15% of Americans Ages 6+, 42.3 million participants
4. **Car, Backyard and RV camping** | 13% of Americans Ages 6+ 38.0 million participants
5. **Hiking** | 12% of Americans Ages 6+, 34.5 million participants

McGaffey Forest in Fall | Chris Easley, Artist

Executive Summary

This report aims to quantify economic impact of adventure tourism on Gallup and McKinley County. Specifically, it details impacts from two data inputs gathered over 10 years: (1) daily trail usage and (2) several annual events. Quantitative daily usage data was reported at High Desert Trail System became the baseline for usage at other hiking and biking trails and venues. Participants from three area events were surveyed for almost 10 years using both written and online surveys. This report outlines county level economic impact travel estimates and participant and spectator spending and lodging expenses. It also is able to showcase year round impact of adventure tourism versus single event impacts.

The specific events were:

- **Squash Blossom Classic** (biking and running events),
Started in 2005, Venue: High Desert Trail System mainly
- **Dawn Til Dusk** (12-hour endurance mountain bicycling event),
Started in 2005, Venue: High Desert Trail System
- **24 Hours in the Enchanted Forest** (24-hour endurance mountain bicycling event),
Started in 2010, Venue: McGaffey Area Trail System, of the Cibola National Forest

Key Findings:

Findings encompass the period of 2002 – 2013 for hikers, bikers, and climbers only.

Trail Users: 289,965

Total Spending by Daily Use: \$16,672,988

Squash Blossom Classic Events—

Total Participants: 2,299

Local: 751

Visitors: 1,558

Total Spending: \$387,062

Dawn Til Dusk Race—

Total Participants: 3,032

Local: 297

Visitors: 2,735

Total Spending: \$440,065

Total Spending by Events: \$952,871

24 Hours in the Enchanted Forest—

Total Participants: 1,266

Local: 53

Visitors: 1,213

Total Spending: \$125,744

McKinley County Combined Spending (Using IMPLAN Multiplier): \$25,592,747

Observations:

Based on the data analysis performed and general annotations associated with our knowledge of the initiative, the following are observations were made by the author given the best information available.

- **Great Recession.** Spending dropped significantly after the Great Recession hit NM in 2008-11. The trend to find inexpensive ways to travel included camping over hotels, grocery shopping versus restaurants, more regional travel, and turning two day trips into one-day turnarounds.
- **Wild Weather.** Weather events had an impact on events and usually translated in reduced participants in the following year of that event.
- **Steady Growth.** Trail usage has steadily risen since 2002; almost 50,000 users a year are utilizing our trails and adventure venues.
- **Best ROI.** Increasing the number of adventure tourists who stop, stay, and stay longer translates into the most significant return-on-investment. Marketing to regional adventure tourists will assist in gaining critical market share and brand recognition in the Four Corners and Southwestern markets.
- **Drive Market Orientation.** The drive market and major corridors, like US491 and Interstate 40, are vital to the expansion of adventure tourism. A focused message and presence must be tied to strong collateral and online materials, trail maps, visitor and transaction-oriented services. Handling tourists, proactive hospitality, and overall tourist experience are critical to overall success.
- **World Class Destination.** Developing Gallup into a world class adventure tourist destination is the next big step. The community needs to re-coalesce around development needs and business creation objectives that support IMBA criteria for being designated as an international Ride Center. This now needs the private sector to lead in partnership with the public, including:
 - Significant private investment in business upgrades, expansions, hospitality training, and new higher end developments. For example, significant business anchors that IMBA scores for a Ride Center destination are lacking or missing from the current business landscape.
 - Steadily increasing public investments in trail construction and subsequent maintenance, venue upgrades, public safety services, and destination marketing.
- **Misunderstanding the Value of Events.** Events are an important metric of success and help detail entrepreneurial activity in this sector. But further, events are much more important as a marketing vehicle. Events fuel and catalyze our year round visitors and tourist users.

They bring legitimacy. Events bring industry leaders, professional and independent riders, industry journalists, and crucial “early adopters” into our area to participate in competitions.

As Malcolm Gladwell discussed in his 2000 book, entitled “The Tipping Point: How Little Things Can Make a Big Difference”, these events attract the three types of agents for social change, notably (1) ‘connectors’, people who harness a web of personnel connections; (2) ‘mavens’, trusted guides or sherpas of new information or places; and (3) ‘salesman’, persuaders or charismatic people with powerful negotiation skills. By attracting these three types of people to our events, we are mindfully working to cause Gallup “to reach a moment of critical mass or to tip”, in other words making travel to Gallup for adventure sports a positive epidemic.

A clear example of this importance is having Levi Leipheimer, US Cycling Legend, come to Gallup. This generates a buzz and stamp of approval on what Gallup has and what Gallup is becoming.

Our target market is actually a much older soft adventure segment. But even this segment is drawn to where the professionals are riding and taking their vacations. Everyone wants to discover the next Moab, and even if they cannot ride 70% of the trails there, they go to be part of the scene. Gallup has been making a small scene and is starting to be seen. Events are a crucial and important part of this evolution of exposure and brand recognition. Investing in events may not put heads in beds that night, but it will all year-round, which is the goal.

Background

The "**Adventure Gallup**" concept emerged in April 1999 during the *Comprehensive Economic Development Strategy (CEDS)* planning process facilitated by the Northwest COG. In 1999, a large, diverse group of community members attended a forum to define an economic development strategy for Gallup and surrounding area. The concept of building on the current assets and 'everything good that Gallup has to offer' rose to the top. This asset-based community development focus led to a homegrown initiative around developing and promoting adventure tourism as an economic driver for the area. The Adventure Gallup concept included developing an adventure tourism initiative to create greater economic opportunity while also supporting education, recreation, culture and health for local residents and enhancing the quality of life.

A **Steering Committee** was formed to further research and develop the initiative, including representatives of the COG, City of Gallup, McKinley County, tribal representatives, non-profit organizations and the private sector. With matching funds from the City of Gallup and McKinley County, the project was able to obtain funding from the State of New Mexico via a Community Development Block Grant (CDBG) to study the feasibility of developing adventure tourism.

The feasibility study, conducted by Southwest Planning & Marketing, demonstrated that adventure tourism, once implemented, could initially increase tourism spending in Gallup by \$5 million (conservatively estimated), create 120 new jobs and provide substantial opportunities for youth and community recreational and volunteer activity. The feasibility study, conducted with active COG involvement and oversight, employed a strong "applied research" model that included an extensive telephone survey and a very well attended public meeting. The research design including these activities resulted in significantly increased community support and participation.

Following the completion of the feasibility study, the COG established a community-based organizational structure for Adventure Gallup. Community participation steadily increased to include over 150 members on an Implementation Team that included active participation across communities and cultures in the McKinley County area. The Activity Center, Land Use, Marketing, and Hospitality committees generated and coordinated plans and projects to methodically move Adventure Gallup forward. In addition, an "Inclusion"

Subcommittee and a Youth Subcommittee continued to develop plans to ensure and maintain a strong

McKinley County – Quick Stats:

- **Population:** 75,000
- **Service Area:** 5,500 sq. miles
- **Population Density:** 12 people per sq. mile
- **Diversity:** 75% - Native American
- **Taxable Land:** Only 19%, over 80% is owned by Federal/State/or in Trust Status
- **Poverty:** Ranked amongst poorest counties nationwide

Market Potential: AGB's Feasibility Study states that adventure tourism has been the fastest growing market of tourism and that a fully developed program and marketing campaign would result in the following outcomes:

Economic Indicator	Impact
Direct Lodging Spending Increase	\$3,449,250
Total Spending with IMPLAN multiplier	\$5,008,311
Total Employment	170 jobs per million dollars spent per year
Total Wages on New Employment	\$2,720,000 in wages
GRT Revenues	\$157,781 per year
Lodger's Tax Revenues	\$197,608 per year

level of community involvement and opportunity. "Adventure Gallup & Beyond" was selected as the marketing name for the project to more accurately reflect and be inclusive of the geographic, cultural and economic opportunities available.

McKinley County, with numerous community partners, applied for and created Youth Conservation Corps and AmeriCorps*VISTA programs that were both significantly focused on Adventure Gallup project needs.

Some Adventure Gallup & Beyond development highlights to date, include:

1999: The "Adventure Gallup" concept emerged during the *Comprehensive Economic Development Strategy (CEDS)* planning process. The concept was to develop and market our natural assets as an adventure tourist destination similar to Moab, Utah.

2000:

- A **Steering Committee** was formed including the COG, City of Gallup, McKinley County, tribal representatives, non-profit organizations and the private sector.
- McKinley County obtained funding from the State of New Mexico via a Community Development Block Grant (CDBG) to study the **feasibility** of developing adventure tourism.

2001:

- The **feasibility study** demonstrated that adventure tourism, once implemented, could initially increase tourism spending in Gallup.
- The "Adventure Gallup and Beyond" initiative was born.

2002:

- The Northwest NM COG received the prestigious National Association of Development Organizations "Pioneer Award" for the Adventure Gallup concept and its Community Development Corporation aimed at rural entrepreneurship.
- UNM Anderson School of Business completed a **marketing plan** for Adventure Gallup & Beyond.
- New Mexico Legislature appropriated \$35,000 to purchase **Mentmore Rock Climbing Area**.
- Gallup's flagship hiking trail up "**Pyramid Rock**" (3-mile) is designed and built by the Youth Conservation Corps (YCC).
- Eight Americorps*VISTA (O².G.) members arrive in Gallup for a three-year program to promote entrepreneurship through adventure tourism.

2003:

- McKinley County accepts deed of easement from private landholding firm Gamero & Associates to develop the **High Desert Trail System**.
- Trail work begins with **Gallup Trails 2010 and Youth Conservation Corps** (YCC).

Target Market – Soft Adventure
Age: 35-54 – depending on activity;
Gender: 52% women/48% men;
Education: 82% are college educated;
Income: \$60-75,000+;
Party Composition: 60% prefer to travel as couple; 15% with children; 13% alone;
Trip Duration: The largest group (50%) preferred longer trips (8-14 days);
Important Elements: (1) wilderness setting; (2) nature viewing; (3) hiking/trekking/biking; (4) authentic cultural experiences
Other: (1) desire to reconnect, (2) authentic experiences, (3) sustainable tourism, and (4)

2004:

- City of Gallup passes a **multi-million dollar** quality-of-life bond for adventure projects, and State Legislature appropriates \$65,000 for adventure venue improvements.
- **High Desert Trail System**, a stacked loop, singletrack trail system (26-miles) is dedicated.

2005:

- State Legislature appropriates \$80,000 for Adventure Gallup improvements.
- City of Gallup sponsors and completes a **Gallup-McKinley Trails and Open Space Master Plan**.
- Gallup hosts its first 12-hour mountain race **Dawn 'til Dusk** at the new High Desert Trail System.
- Gallup hosts its first X-C mountain bike race – **High Desert Screamer** during the Squash Blossom Classic event.

2006:

- **Zuni Mountain Trail Partnership** formed as a result of an agreement between the US Forest Service, McKinley County, Gallup Trails 2010, Connections/YCC, and Adventure Gallup & Beyond.
- **Gallup Shooting Range** is constructed and opened to the public.

2007:

- Started working with **NPS-Rivers, Trails, & Conservation**, **ZMTP**, and **IMBA** on a comprehensive trail system for the Zuni Mountains (connecting rural communities including Gallup).
- Adventure Gallup & Beyond develops and implements a 5-day cycling tour through Native American communities called “Tour of the Nations”. This ran for two years before becoming to “big” for a non-profit organization.

2008:

- Gallup holds its first triathlon taking advantage of the Aquatic Center.
- McKinley County awarded the Childhood Obesity Prevention award by the National Association of Counties for the AGB concept and our “Healthy Children by Design” philosophy and program.

2009: Gallup Trails 2010, a trails advocacy organization, was awarded the Jessica R. Terrell Trails Award by State Parks of the NM Energy, Minerals, and Natural Resources Department.

2010:

- **24 Hours in the Enchanted Forest** – NM’s first 24-hour mountain bike is established in the Zuni Mountains.
- Dedication and grant opening of the **Gallup ATV/OTV/Motocross Park**, a City-owned park with Motocross track and miles of trails.

2011:

- Dedication of the **Hilso Trailhead** and **McGaffey Trail System** in the Zuni Mountains (Cibola National Forest).
- Gallup is named the **“Adventure Capital of New Mexico”** by NM Legislature, House Memorial 18. Adventure Gallup & Beyond took instant advantage of this branding opportunity and through the COG leveraged local City Lodgers’ Tax and County investments to obtain funding

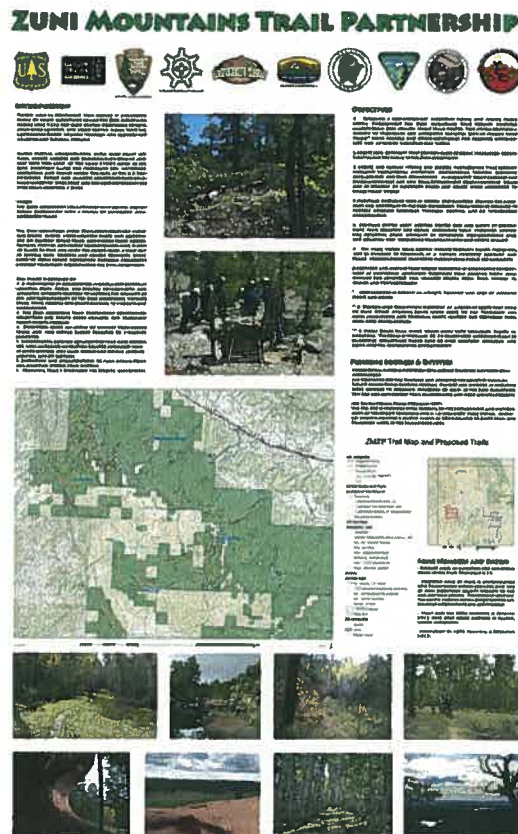

through the New Mexico Tourism Department for a marketing campaign. AGB worked with a local advertising and publishing firm Gallup Journey to produce over 15,000 maps that have been selectively distributed in major markets.

2012:

- **USA Cycling** selects Gallup and the “24 Hours in the Enchanted Forest” to host Nationals in 2013-14.
- Secretary of the Interior Ken Salazar and National Park Service Director Jonathan B. Jarvis recognized High Desert Trail System, a 26 mile single track, stacked loop system built entirely on private land, as a **National Recreation Trail**.
- Gallup presents its story at the **IMBA World Summit** of the International Mountain Biking Association (IMBA) in Santa Fé, which catalyzed community momentum towards becoming the first IMBA Ride Center designated in New Mexico.

2013:

- USA Cycling held the **National 24-Hours Mountain Bike Race**, on the McGaffey Trail System, with over 500 racers from around the nation.
- Zuni Mountains Trail Partnership, working with US Forest Service, is in the process of designating over **250+ miles of singletrack trails** throughout Cibola and McKinley counties.
- **Levi Leipheimer, US Cycling Legend**, comes to Gallup and hosts several events to raise funding for the IMBA Ride Center designation.
- City Council votes “yes” to create a bike park, and in less than 3 months Levi Leipheimer hosts the grand opening of Gallup’s newest adventure asset the **Gallup Brickyard Bike Park**, a multi-use trail system including a BMX and skills section, flow trails, and a perimeter walking trail. Kudos to Nat Lopes, HilRide and Gallup Youth Conservation Corps for turning this eyesore into a community and wellness asset.

Methodology

This is a very limited study. It is limited in terms of primary and secondary data availability and in terms of ability to pull in a more comprehensive impact model and techniques. It offers merely a glimpse into the potential and comprehensive impact of the adventure tourism market.

Adventure tourism is defined for our local use as any non-conventional outdoor sports event or activity. The focus is on participatory events or activities, but can be expanded to capture spectator events, such as ballooning and rodeo. This expanded definition includes hiking, running, biking, backpacking, ballooning, birdwatching, skiing/shoeing, horseback riding, ATV, Motocross, geocaching, snowmobiling, swimming, archery, shooting, 4WD rock crawling, rockclimbing, mountain biking, and rodeo. With this report, we focused solely on the following users groups - hikers, mountain bikers, and climbers. In terms of users and events for this report, we focused solely on mountain biking and running events.

Our approach was to:

- 1) Review other publications and review their methodology;
- 2) Compile and calculate user data from various adventure tourism venues, which were fact checked by key informants;
- 3) Compile and calculate event survey data and economic impact reports, which were provided by event promoters and participant responses;
- 4) Produce a report of these findings and provide recommendations.

Review and Interpretation of Other Publications

The COG reviewed recent publications for guidance and approach, including:

- 1) **An Economic Impact Study of Bicycling in Arizona, June 2013.** Prepared by McClure Consulting, LLC., Economic & Policy Resources, Inc., and Kimley-Horn and Associates, Inc. COG has pulled out Section 1 that reviews other bicycle-impact-related literature, an annotated tabulation of potentially relevant data sources. This is important to outline and help quantify other economic impacts of investing in ped- and bike- friendly facilities, in the fields of health, infrastructure, etc.
http://wwwa.azdot.gov/ADOTLibrary/Multimodal_Planning_Division/Bicycle-Pedestrian/Economic_Impact_Study_of_Bicycling-Final_Report-1306.pdf
- 2) **The Economic Significance of Bicycle-Related Travel in Oregon, April 2013.** Prepared by Dean Runyan Associates. http://www.deanrunyan.com/doc_library/bicycletravel.pdf
- 3) **The Economic Impact of Mountain Bicycle Events in Oregon, February 2013.** Primarily prepared by Jeff McNamee, PhD., Linfield College and Kreg Lindberg, PhD, Central Oregon Research Services. An important report that provides great guidance on event surveys and questions to ask moving forward.

Venue Participation Numbers and Assigned Value

The COG utilized the High Desert Trail System as the baseline data set. There were trail counters that were installed, but failed to produce accurate usage numbers. All data was quantitative, and was provided and then reviewed by key informants.

All event participation was considered and kept separate for daily usage calculations. High Desert Trail System usage statistics began in 2004-05 with Adventure Gallup & Beyond's first report to Gamerco & Associates. Usage data was broken down seasonally.

Based on the baseline at High Desert Trail System (HDTs), the COG made assumptions about usage at other venues based on quantitative data and key informants, these included:

Venue	User Assumptions
Red Rock Trail System	130% compared to HDT usage, or 1.3 times In years of 2002-2004, since HDT was not in existence a flat value of 1,000 users was given.
Hogback Trail System	A flat value of 900 users per year was used.
High Desert Trail System	Actuals based on HDTs usage data analysis
McGaffey Area Trail System	30% of HDT use, or .3 times
Mentmore Rock Climbing Area	A flat value of 1,000 users per year was used.

We only looked at three user groups for this research and did not include all adventure tourists. These groups were hikers/walkers (with or without dogs), runners, and mountain bikers.

Event Data and Economic Impacts

The COG utilized survey data from each event provided by the event promoters through physical or online surveys administered after the event. The COG used this data and calculated event economic impact studies for each event. Each event and study has a set of assumptions and calculations. For the most part, a standard approach has been used across different events and across the same event over different years.

Again, the only events used for this report were:

- **Squash Blossom Classic**
- **Dawn Til Dusk**
- **24 Hours in the Enchanted Forest**

Findings and Conclusions

As mentioned in the Methodology section, there were some limitations on primary data for analysis of usage. Analysis of daily usage is key to determining year-round impacts. While the events, are only a one-day blip on the radar.

High Desert Trail System – Use Baseline

A multi-use, singletrack trail system that attracts local, regional, and national use by walkers/hikers, runners, and mountain bikers. Based on quantitative data, the COG tracked season usage since the trail system opened in 2004 and High Desert Trail System usage per season is as follows:

2004-2005:

Season	Avg. users per day	Total Users per Season
Fall	7.78	700
Winter	2.22	200
Spring	10	900
Summer	13.33	1,200
	TOTAL	3,000

2005-2006:

Season	Avg. users per day	Total Users per Season
Fall	15.56	1,400
Winter	4.44	400
Spring	20.00	1,800
Summer	26.66	2,399
	TOTAL	5,999

2006-2007:

Season	Avg. users per day	Total Users per Season
Fall	17.89	1,610
Winter	5.11	460
Spring	23.00	2,070
Summer	30.66	2,759
	TOTAL	6,899

High Desert Trail System is a designated National Recreational Trail. It is entirely on private land, which Gamerco & Associates entered in a Grant of Easement with McKinley County to provide this multi-use, non-motorized singletrack trail experience. Renewal of that easement is conditional on proving economic benefit and maintaining facility integrity. Named for the late Charles High, and three loops are named like the Hopi Reservation's First Mesa, Second Mesa, and Third Mesa.

Adventure Gallup & Beyond is responsible for maintenance, monitoring, and meeting economic development requirements as the "Gatekeeper".

2007-2008:

Season	Avg. users per day	Total Users per Season
Fall	20.58	1,852
Winter	5.87	528
Spring	26.45	2,381
Summer	35.26	3,173
	TOTAL	7,934

2008-2009:

Season	Avg. users per day	Total Users per Season
Fall	25.72	2,315
Winter	7.34	661
Spring	33.06	2,976
Summer	44.07	3,967
	TOTAL	9,918

2009-2010:

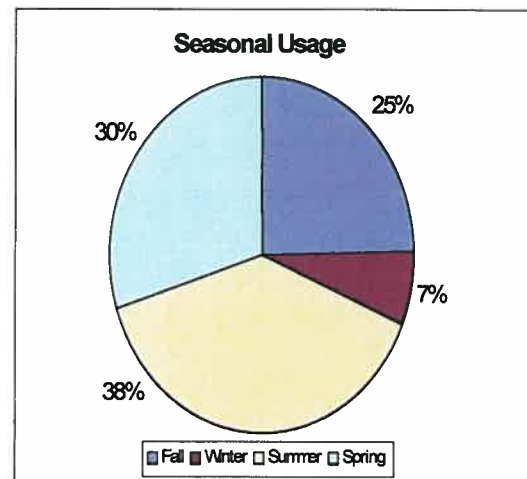

Season	Avg. users per day	Total Users per Season
Fall	32.15	2,894
Winter	9.17	826
Spring	41.33	3,720
Summer	55.09	4,958
	TOTAL	12,397

2010-2011:

Season	Avg. users per day	Total Users per Season
Fall	35.37	3,183
Winter	9.17	826
Spring	45.46	4,091
Summer	60.60	5,454
	TOTAL	13,554

User Profiles. The distribution of user profiles is widespread. The trail is used by folks of all ages and reflective of area races. The sex of users is also evenly distributed, about 52% female and 48% male. Users are interested in the trail for different reasons, including: health and exercise, training, recreation, and relaxation.

Seasonality. The frequency of use is weather-related. During and after heavy summer rains or winter snow the trail system is often unused do to the soil consistency and potential damage on parts of the trail. Trail use also dips in the extreme periods of heat.

2011-2012:

Season	Avg. users per day	Total Users per Season
Fall	38.91	3,501
Winter	9.17	826
Spring	50.01	4,501
Summer	66.66	5,999
	TOTAL	14,827

2012-2013:

Season	Avg. users per day	Total Users per Season
Fall	38.91	3,501
Winter	9.17	826
Spring	50.01	4,501
Summer	73.33	6,599
	TOTAL	15,427

User Groups. There are three major groups using the trails: hikers/walkers (with or without dogs), runners, and mountain bikers. The other user has been the occasional, illegal motorized vehicle user, which Gallup Trails 2010/YCC has done an excellent job mitigating and controlling access points. The frequency of use between each user group has been split pretty evenly.

Other Venues and Trails Users

Based on the methodology, the COG generated usage at other venues based on High Desert Trail System data. A detailed spreadsheet is available in Appendix. Analysis period included 2002 until September 2013.

Trails & Venues Usage:	
Red Rock Trail System	111,364
Hogback Trail System	7,200
Ramah Trail System	0*
High Desert Trail System	89,956
McGaffey Area Trail System	62,969
Mentmore Rock	9,900
Total Adventure Users	289,967

*Note: Ramah Trail System was not completed or opened until after September 2013.

Users – Economic Impact

The total number of users combines three categories of users: local, regional, and tourists. The COG assumed that each individual user regardless of category spends on average \$50 per use for gas, food, supplies, etc. It was also assumed that only 15% of all users resulted in the purchase of a hotel or motel room.

Based on these assumptions, the COG generated the following economic impact for general spending and lodging expenditures. A detailed spreadsheet is available in Appendix.

Economic Impact of Users	
Spending (\$50 per user)	\$14,498,357
Lodging (\$50) - 15% of Users	\$2,174,754
Total Expenditures	\$16,673,111

Over the last five years, this usage breakdowns as follows:

Expenditure	2009	2010	2011	2012	2013
General Spending	\$1,582,700	\$1,954,550	\$2,128,100	\$2,319,050	\$2,409,050
Lodging	\$237,405	\$293,183	\$319,215	\$347,858	\$361,358

Events – Economic Impact

Events are important way to bring exposure to a region and raise international awareness about our town and its assets, venues, and trails. The COG focused on three major events for the periods of:

- **Squash Blossom Classic (2005-2012)** – The 2013 event did not occur at the time of this report.
- **Dawn Til Dusk Endurance Race (2005-2013)**
- **24 Hours in the Enchanted Forest (2010-2013)**

Participant data was collected through surveys, from which the COG created individual event impact studies. A snapshot of those results are showcased below, while a complete breakdown is available in the Appendix.

Economic Impact of Events	
Events: (based on studies)	
Dawn Til Dusk 12-Hour Mtn. Bike	
General Spending	\$345,896
Lodging	\$94,169
Squash Blossom Classic	
General Spending	\$307,204
Lodging	\$79,858
24-Hrs in Enchanted Forest	
General Spending	\$115,794
Lodging	\$9,950
Total Event Expenditures	\$952,871

Total Economic Impact

The total of user generated and event generated expenditures is **\$17,625,859** over a 10-year period. According to Southwest Planning & Marketing, McKinley County's IMPLAN multiplier is 1.452. Utilizing this IMPLAN multiplier, the total economic impact is **\$25,592,747**. Over the last five years, these combined expenditures breakdown as follows:

Expenditure	2009	2010	2011	2012	2013
Total Spending	\$1,925,340	\$2,379,532	\$2,613,549	\$2,795,242	\$2,863,644
Multiplier Effect	\$2,795,594	\$3,455,080	\$3,794,873	\$4,058,691	\$4,158,010

RECOMMENDATIONS

As stated, this report provides only a small glimpse into the adventure tourism and its economic impact. Data for this report was limited. To increase the ability and accuracy of measurement the following recommendations have been provided.

Research Other Publications. Review other adventure tourism studies that have been produced to understand what metrics are important and how to produce these through data.

Trail Counters: A concrete action that needs to be taken is to purchase and install new generation and working trail counters at major venues and trails. This will provide instant data and tracking for more accurate information. One suggested equipment and software package is TRAFx G3 System Package. Investigate models for effectively cataloging users at the ATV/Motocross Park and Brickyard Bike Park, as well as horseback riders, birdwatchers, cross-country skiers, etc.

Event Surveys: Need to review Dr. Jeff McNamee's survey questions and determine which questions and how they are answered are most important to generate data for economic impact studies. Move these online using survey monkey or a comparable technology for easy data tabulation and relationship mining.

Partnerships: Expand this research and report to the entire adventure tourism market, including user information and events, including but not limited to: Red Rock Balloon Rally, ATV/Motocross events, US Team Roping Championships, Wild Thing Bullriding and other rodeo events, etc. Increase partnerships with Gallup Chamber of Commerce, Greater Gallup Economic Development Corporation, Lodger's Tax Board, NM Tourism Department, NM Department of Transportation, and Economic Development Department to invest in a complete assessment and analysis.

Lodgers' Tax: This Board should require a standard survey and reporting methodology for every organization that receives Lodgers' Tax for events. This information should be available for public use.

All statistics provided by event promoters through a survey of the participants and based on the following assumptions:
 1. The costs associated with the study are based on the premise that the average in Gallup, NM: (1) Hotel cost is \$50 a night; (2) Meal is \$12 per visitor;
 (3) Gasoline fill-up is \$40 per participant;
 (4) Grocery store visit is \$30;
 (5) Pawn/trading post/mall/flea market visit is \$40; (6) Outdoor / bike shop visit is \$20;
 (7) Pharmacy visit is \$15; and (8) Camping is \$0.
 2. The study assumes that one visitor is different then one participant.
 3. It assumes that each out-of-town participant filled up their car only one time.
 4. It assumes that each registered
